

Your Power to Save

866-NJSMART

June 2014

Join the thousands of New Jersey homeowners, businesses and municipalities that have taken advantage of incentives offered by *New Jersey's Clean Energy Program™*. These programs provide opportunities for you to save energy, money and help protect our climate and shoreline.

WATER CONSERVATION

It's hard to believe but the average family of four uses approximately 400 gallons of water each day. This water use can easily be cut as much as 30% by taking a few simple steps.

You can do your part to save water at home in many ways. Just by turning off the tap while you brush your teeth in the morning and before bedtime, you can save up to 8 gallons of water! Think you know everything there is to know about water? You can't be sure until you've played EPA's new "[Test Your WaterSense](#)" online quiz! [Learn more.](#)

TOP TEN SUMMER TIPS

As temperatures heat up this summer, remember that energy efficiency can keep you cool while saving money and preserving the earth's resources.

While we all look forward to the summer months (especially after this winter!), higher energy bills are not welcomed. Whether you are running your air conditioning more often, or using more water to take showers, we have the tips you can use to help keep your bills in line. Our top ten list will help you keep more money in your pocket. [Learn more.](#)
