

Your Power to Save

866-NJSMART

October 2014

Join the thousands of New Jersey homeowners, businesses and municipalities that have taken advantage of incentives offered by *New Jersey's Clean Energy Program™*. These programs provide opportunities for you to save energy, money and help protect our climate and shoreline.

PUT YOUR HOME TO THE TEST WITH A HOME PERFORMANCE WITH ENERGY STAR ASSESSMENT

Did you know that more than half of all single-family homes in the United States were built before the enactment of modern energy codes? That means that many people have drafty homes that are poorly insulated, suffer from hot/cold spots, and likely have inefficient heating and cooling systems that contribute to high energy bills.

A Home Performance with ENERGY STAR assessment can help you target those problem areas. To help you pay for the work, rebates up to \$5,000 are available as well as 0% financing. This [video](#) can show you what to expect during the assessment, and we can also help you find a contractor to get started. [Learn More.](#)

ENERGY AWARENESS MONTH

Since 1991 we have celebrated October as Energy Awareness Month with actions to promote public understanding of our energy needs and simple ways to reduce the amount of energy we consume in our everyday lives.

Energy efficiency is a priority in New Jersey - and that is why the Clean Energy Program offers incentives to help encourage the selection of the most efficient equipment for your home or business. Homeowners can benefit from rebates on [refrigerators](#), [clothes washers](#), [water heaters](#), [furnaces](#), [boilers](#), [heat pumps](#), and [cooling systems](#). Rebates are also available to [businesses and municipalities](#) who would like to reduce their energy bills and invest those savings elsewhere.

FREE ENERGY CONSERVATION SERVICES

Home heating is a high-cost necessity in New Jersey. For people with low incomes, the decision to pay the utility bill may mean deciding between being warm in the winter or having well-balanced meals.

The Comfort Partners Program provides free home energy conservation services to eligible low-income homeowners and renters. The free cost-effective energy efficiency measures can include hot water conservation measures (water heater insulation, pipe insulation and energy-saving showerheads and aerators); replacement of inefficient refrigerators, thermostats and lighting; insulation upgrades (attic, wall, etc.); air and duct sealing; and heating/cooling equipment maintenance.
