Your Power to Save

October 2016

Join the thousands of New Jersey homeowners, businesses and municipalities that have taken advantage of incentives offered by **New Jersey's Clean Energy Program™**. These programs provide opportunities for you to save energy, money and help protect our climate and shoreline.

IT'S EASY, FREE AND IT PAYS YOU \$75

If you are buying a new refrigerator or freezer or are ready to get rid of that second unit in the garage, we can help.

New Jersey's Clean Energy Program offers **FREE** pickup and recycling of your old, inefficient refrigerators and freezers.

Refrigerators built before 1993 can use two to three times more energy than newer, high-efficiency models. We will recycle your working appliance in an environmentally responsible way, breaking down each part to properly recycle it - keeping 95% of the appliance out of landfills.

You can **schedule your pick-up on-line** or call us at **866-NJSMART** - you can also find out about **\$75 rebates** on energy-efficient refrigerators.

RULE YOUR ATTIC THIS WINTER

Are you experiencing a drafty house and high energy bills? Get ahead of the game and have a contractor improve the comfort and energy efficiency of your home.

Did you know that 9 out of 10 homes in the U.S. are under-insulated? Sealing air leaks around your home and adding insulation, especially in the attic, can help you be more comfortable and save on your home's energy bills.

A Building Performance Institute (BPI) Gold Star contractor under the **Home Performance with ENERGY STAR® Program** will assess your home from top to bottom, identifying areas where heat is escaping from your home. The contractor will provide you with energy-saving improvements that will benefit you and your family. A \$4,000 rebate and 0% interest loans are available to pay for the work. Call a participating contractor today!

We're Here to Help

About the New Jersey Clean Energy Program (NJCEP):

Provides financial and other incentives to the State's residential customers, businesses, local governments and schools that install high-efficiency or renewable energy technologies, thereby reducing energy usage, lowering customers' energy bills and reducing environmental impacts. In totality over the last fifteen years, New Jersey has invested more than \$3.1 billion in approximately 1.5 million energy saving projects that have reduced electric use by approximately 7% - enough energy savings compounded over 15 years to power about 3.1 million homes. The program is authorized and overseen by the New Jersey Board of Public Utilities (NJBPU), and its website is www.NJCleanEnergy.com.

Call us at **866-NJSMART** (866-657-6278) for information on these and other energy-saving programs for your home or business.
